RZ/G Verified Linux Package for 64bit kernel Version 1.0.1

Component list

Components listed below are installed to the rootfs which is used for booting the target boards by building Verified Linux Package according to the Release Note.

Each image names are corresponding to the target names used when running bitbake command such as "bitbake core-image-weston". Column "weston (Gecko)" corresponds for the building procedure for HTML5 described in the Release Note.
